WHY WE EXIST

A CV that gets read. A path that keeps going.

South Africa has talent in every town and opportunity in too few of them. CV2CU.online exists to close that gap. We give every person a professional foundation they own: a clear, ATS-friendly CV, a Career Passport that carries their story, and honest feedback on what to improve next.

We do the same for the people building the economy around them: entrepreneurs, sole proprietors and registered companies get free business tools, employers reach candidates who are ready, and sponsors fund access for people who need a start.

OUR PURPOSE

Make professional opportunity accessible, visible and fair, for the person starting out, the person building a business, and the people who open doors.
